Monitoring HIV Care in the United States-Institute of Medicine 2013-01-19 In September 2010, the White House Office of National AIDS Policy commissioned an Institute of Medicine (IOM) committee to respond to a two-part statement of task concerning how to monitor care for people with HIV. The IOM convened a committee of 17 members with expertise in HIV clinical care and supportive services,

epidemiology, biostatistics, health policy, and other areas to respond to this task. The committee's first report, Monitoring HIV Care in the United States: Indicators and Data Systems, was released in March 2012. The report identified 14 core indicators of clinical HIV care and mental health, substance abuse, and supportive services for use by the Department of Health and Human Services (HHS) to monitor the impact of the National HIV/AIDS Strategy (NHAS) and the Patient Protection and Affordable Care Act (ACA) on improvements in HIV care and identified sources of data to estimate the indicators. The report also addressed a series of questions related to the collection, analysis, and dissemination of data necessary to estimate the indicators. In this second report, Monitoring HIV Care in the United States: A Strategy for Generating National Estimates of HIV Care and Coverage, the committee addresses how to obtain national estimates that characterize the health care of people with HIV within the context of the ACA, both before 2014 and after 2014, when key

provisions of the ACA will be implemented. This report focuses on how to monitor the anticipated changes in health care coverage, service utilization, and quality of care for people with HIV within the context of the ACA.

Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious

Geely Drives Out: The Rise Of The New Chinese Automaker In The Global Landscape-Hua Wang 2021-07-13 Since 2008, while the global automotive manufacturing has been faltering, the Chinese auto industry has been swiftly transformed into the largest producer in the world. The growth of the Chinese automakers is a close reflection of China's powerful manufacturing economy, and Geely Auto is one such best example. This book closely examines the rise of Geely as a privately-owned automaker in China. The book reveals how the little-known carmaker is worth

close examination, via its product development, organizational dynamics, corporate culture, brand development, talent and cross-cultural management strategies, as well as the entrepreneurship of its visionary founder Shufu Li. From catching up in technology to a leader in product, service and business model innovations, Geely has driven out as a new Chinese automaker on the world stage. Facing challenges in clean energy and Internet of Things, artificial intelligence, new user's experience towards smart and mobility solution, Geely will continue to play an increasingly important role in the globalization age of the twenty-first century.

Evidence-Based Emergency Imaging-Aine Kelly 2018-03-28 This book presents evidence-based criteria to systematically assess the appropriate use of medical imaging in the emergency department and other acute care settings. Over the last decade, there have been profound changes in the diagnostic testing and work-up of patients presenting to the emergency department with emergent symptoms. One of the most far-reaching changes has been the increased availability, speed, and accuracy of imaging due, in part, to technical improvements in imaging modalities such as CT, MR, and PET. Although the use of high-end imaging has plateaued in general, increased utilization continues in the ED. These patients are more acutely ill and there is additional pressure to make an accurate diagnosis as quickly as possible to facilitate prompt disposition or treatment. There is also strong evidence for the beneficial use of imaging in the emergency setting that results in improved patient outcomes. This book answers that need by providing protocols and guidelines for

neuroradiological, cardiothoracic, abdominal and pelvic, musculoskeletal, and pediatric imaging are reviewed in terms of the available imaging modalities, diagnostic criteria, and treatment options. Distinguished by its unique focus on evidence-based emergency imaging in adults, children, and special populations, this book is a unique resource for radiologists, emergency medicine physicians, and physicians in other specialties who need to be informed about the most appropriate uses of diagnostic imaging in the emergency care setting.

Privacy and Security in the Digital Age-Michael Friedewald 2016-01-13 Privacy and data protection are recognized as fundamental human rights. Recent developments, however, indicate that security issues are used to undermine these fundamental rights. As new technologies effectively facilitate collection, storage, processing and combination of personal data government agencies take advantage for their own purposes. Increasingly, and for other reasons, the business sector threatens the privacy of citizens as well. The contributions to

this book explore the different aspects of the relationship between technology and privacy. The emergence of new technologies threaten increasingly privacy and/or data protection; however, little is known about the potential of these technologies that call for innovative and prospective analysis, or even new conceptual frameworks. Technology and privacy are two intertwined notions that must be jointly analyzed and faced. Technology is a social practice that embodies the capacity of societies to transform themselves by creating the possibility to generate and manipulate not only physical objects, but also symbols, cultural forms and social relations. In turn, privacy describes a vital and complex aspect of these social relations. Thus technology influences people's understanding of privacy, and people's understanding of privacy is a key factor in defining the direction of technological development. This book was originally published as a special issue of Innovation: The European Journal of Social Science Research.
