The Greenwood Encyclopedia of Daily Life in America [4 volumes]-Randall M. Miller Ph.D. 2008-12-30 The course of daily life in the United States has been a product of tradition, environment, and circumstance. How did the Civil War alter the lives of women, both white and black, left alone on

southern farms? How did the Great Depression change the lives of working class families in eastern cities? How did the discovery of gold in California transform the lives of native American, Hispanic, and white communities in western territories? Organized by time period as spelled out in the National Standards for U.S. History, these four volumes effectively analyze the diverse whole of American experience, examining the domestic, economic, intellectual, material, political, recreational, and religious life of the American people between 1763 and 2005. Working under the editorial direction of general editor Randall M. Miller, professor of history at St. Joseph's University, a group of expert volume editors carefully integrate material drawn from volumes in Greenwood's highly successful Daily Life Through History series with new material researched and written by themselves and other scholars. The four volumes cover the following periods: The War of Independence and Antebellum Expansion and Reform, 1763-1861, The Civil War, Reconstruction, and the Industrialization of America, 1861-1900, The Emergence of Modern America, World War I, and the Great Depression, 1900-1940 and Wartime, Postwar, and Contemporary America, 1940-Present. Each volume includes a selection of primary documents, a timeline of important events during the period, images illustrating the text, and extensive bibliography of further information resources—both print and electronic—and a detailed subject index.

Explorations in Environmental History-Samuel P. Hays 1998-02-15 Samuel P. Hays is one of the most distinguished scholars in the field of environmental history and the leading thinker of its first generation. The range and quality of the scholarship collected here reflect his work as a teacher, scholar, and activist writing in environmental history and provide a powerful exclamation point to a long and distinguished career. The depth of Hays's research is evident on every page of this collection. He was not one who published just to publish; he wrote what was important and spoke to the heart of continuing debates about the environment from 1959, with the publication of Conservation and the Gospel of Efficiency to the present day. As well as representing his best work from the past four decades, this collection includes four pieces published here for the first time. One of these, the opening essay, is Hay's autobiographical account of his

encounters with many participants in environmental studies and those vigorously involved in contemporary environmental politics. Amid the entire series of environmental dramas that have engaged his attention, he has sought "to establish the case that a perspective of change and evolution over time, the focus of the historian, can be of immense value in informing the ongoing debates over environmental affairs." This argument runs through this work.
