The Developmental Psychology of Music-David J. Hargreaves 1986-12-18 This book sets out the psychological basis of musical development in children and adults. The study has two major objectives: to review the research findings, theories and methodologies relevant to the developmental study of music; and to offer a framework within which these can be organised so as to pave the way for future research. It describes the relationship between thinking and music, and discusses the relationship between thinking and music in pre-schoolers and schoolchildren in areas such as singing, aesthetic appreciation, rhythmic and melodic development, and the acquisition of harmony and tonality. The book describes the development of musical taste, and discusses the questions of musical creativity, and of the social psychology of musical taste and fashion. As a comprehensive study of the links between developmental psychology and music education, Hargreaves' work demonstrates the practical and theoretical importance of psychological research on the process underlying children's musical perception, cognition and performance.

Child Development: Thinking About Theories Texts in Developmental Psychology-Phillip T Slee 2014-02-04 Many areas of developmental psychology have witnessed much important research in recent years, challenging old assumptions and bringing new findings and perspectives to light. The Texts in Developmental Psychology series has been designed to embrace the emergence of new areas and developments in the field from a global perspective, providing state-of-the-art, higher level introductions to major topic areas. Each volume is written by specialists who combine empirical data and a synthesis of recent research to deliver cutting-edge science in a format accessible to students and researchers alike. Child Development: Thinking About Theories is one of the few texts to critically examine both modern and postmodern contributions to theoretical development in child and adolescent psychology. The text has been written specifically taking into account the findings from a focus group of Honours psychology students to include pedagogical features such as an overview of theories linking the various schools of thought, ideas for further study and links to selected websites; as well as the latest developments in theoretical thinking including evolutionary theory, feminism and indigenous theory, and implications of theory for practice. Drawing from a worldwide background of research, the text is unique in that it contains many examples from Australia and other Pacific nations. This clear and concisely written text by two university lecturers in the field of child and adolescent psychology will prove a valuable resource for advanced undergraduate/Honours students of psychology and other closely related disciplines.

Of Children-Guy R. Lefrancois 1994 As in previous editions, this book approaches the study of child development from an inside/outside perspective, looking at children from an abstract or research-based point of view as well as from a personal or experiential perspective. The "whole child" is addressed at each stage of development in a chronological format with each stage presenting physical, cognitive, social, and emotional facets of the child.

Strong coverage of research, theory, and issues in developmental psychology is augmented with examples to show their implications to students.

Handbook of Early Childhood Intervention-Jack P. Shonkoff 2000-05-22 This 2000 book provides a comprehensive overview of this complex field by an outstanding group of contributing authors.
